

elite
more natural technology

earn[®]et
hearing systems

elite series, created a success story that has a superior technology proved by experience and it satisfies the user.

Since 2007, the performance, the ability and the satisfaction degrees of **earnet** series have been tested on more than 3.000 users.

The comparison was done with the devices which is working with other algorithms.

As a result;

The success of the new algorithm and the adaptation method has been far ahead than the others.

earnet[®]
hearing systems

This product that the users prefer, was equipped by new algorithms and it was decided to write the new story.

The story of *elite*, which takes place in the life and was proved by the experiences of the users, was born as a result of a successful story which was detected with benefits.

The people, who experienced the *elite* technology, never wanted to give it up due to it's genius talent.

Because the experienced technology offers much more comfort, comprehension and sound clarity according to the other existing technologies.

The differences are clear...

- 1- While existing heard technology focuses on the sound that can be heard comfortably, *elite* series focuses on both the sound and on the comprehension at the same time.
- 2- It sends the sound which is important for speech to the ear naturally without touching to the middle level and doesn't change the sound.
- 3- The user both can hear all the sounds in a wide frequency comfortably and can integrate with the nature of the sound that exists at the same time.
- 4-The music and the thinner sounds can be seperated comfortably.
- 5- All the time and everywhere the comprehension stays clear.
- 6- As it has wider and more natural frequency, the resolution of all signals is high all the time.
- 7- *elite* series offers more developed and more comfortable sound than the previous technology.

elite series,
that carries,
the naturalism,
the pureness
and the clearness of the sound to the actual
life, has a special position in the previous
technologies.

earnnet is calling you...

- To enrich your life with the sounds as a part of the nature,
- To get rid of being poor of the sound,
- To make the speeches joyful in the world of the sounds,

- To introduce not only one part of the sounds but also all the range,
- To colour and to spice your life,
- To have the things that you have to get from the life by forcing the limits of happiness at the same time.

To enjoy in the real world of the sounds.

The leader technology of the future...

elite technology is the pioneer of a new application and technology era.

A technology that will create difference in your life

Your device has to have more different abilities and adaption capability to the changes in different environments.

Special *elite* series, to the ones who give the real value to themselves,

Love the life abundantly and
Choose to live with technology.

The performance:

It offers more active and faster adaptation in all living space.

The comfort:

All the fields have to stay comfortable in their own comfort level.

elite device keeps the comfort level by passing to the different fields automatically.

The customisation:

Your sense of hearing, your life style and your needs are always individual. It tries to offer solution by respecting to your expectations.

The natural life:

As we give place to the different sounds in the life we become a part of the life and the nature. We live the pleasure of the natural life by hearing the rain drops, the leaves falling from the trees, the birds singing and most importantly the signals existing in our environment and walking around all day.

The design:

It has such a special and elegant design that, put aside hiding the device, you won't even feel to hide it. All of the models have a different beauty and aesthetic.

The trust:

It is resistant to the difficult conditions and the water, it doesn't allow the device to get affected from the dust and sweat.

Multichannel MPO:

By being adapted to every channel independently it prevents the perturbation of the high sound. As the dynamic space is protected, it contributes to comfortable comprehension.

Feedback preventer:

While using hearing aid the sources that causes feedback can change. By following the changes, the sources that cause feedback are eliminated without conceding the sound quality.

The whispers are lively:

The sound is amplified to the comprehensible level by empowering the whispered speeches in lower tones.

Decreasing the noise:

You can understand the talks and participate in to the chats in places which have specific noise like in routine activities, at work, in a crowd or in a shopping center.

Hearing programs:

The memories have been prepared according to the equipment of your device for different environments. As the BTE devices have the environmental analyse systeme, they do the transition automatically.

Sounds are soft:

Every environment can have sharp peak sounds by itself and this can disturb the user. The sharpness and the hardness of the sound is being softened and being lowered in normal hearing level. The sounds of the glass and the pot are softer and clearer.

Sounds are close:

By adaptive microphone system background sounds are being suppressed and the sounds coming from the front are getting closer.

Automatic environment:

As the life is active, environmental transition happens actively and calmly.

Automatic versatility:

The characteristic natures of the sounds existing around us are different and various. As the variety of the sound is increasing there happens concentration problem. It focuses on the desired direction with the superior automatic versatility system.

Stable noise silencer:

Every environment can have stable noise according to its nature and it can disturb the user. Your device which is equipped with silencer system weakens the noises such as motor and climate.

Noise cleaner:

When the noise mixes with the speech, it weakens the speech and makes difficulties in comprehension. For the noise cleaner system, it weakens the noises between the speeches, decreases the effect and gives vitality to the speech. It becomes active according to the device's choice in 8/16/32 channels.

Special for whom...

- Special designed *elite* series offers a real elite sound,
- To the ones who want to hear pure sound despite the hearing loss,
- To the ones who wait for the comprehension despite high frequency loss,
- To the children who are the technology victims and can not express themselves,
- To the older people who spend too much energy to understand something in the calm environments,
- To the ones who can not listen the music although they see it as a part of the life,
- To the ones who live concentration problem while listening.

To live with **earn**et solution...

Now you can spend the time happily and in connection rather than waiting for the solution. You can take place in the society by making dialogues and being an active person rather than being isolated in the corner.

Opportunities are in your hands...

The opportunities sometimes can be bought but the peace can never.

The people who get the opportunity sometimes catch the peace together as well and live it as much as they want.

elite series offers an elite sound and a peaceful life to the people who want to hear.

Natural habits were your happiness, we are giving them back to you.

Because you have always loved the natural one and have missed it.

And we have discovered the natural technology and now we're offering it to you...

*The ones who live comprehension,
comfort and communication problem
can have more smooth life by using the *elite* serie.*

All of the BTE devices don't get affected by the water, sweat and dirt.

Easy to use, comfortable, longlasting and has a technological equipment that consumes low energy.

It has the ability of aesthetic, comfortable adaptation and short term adaptation.

With the superior equipment Micro Groups gives extraordinary comfort and power...

Summarized technical specifications...

- 32 channel,
- 16 channel MPO,
- 32 channel speech management,
- Adaptive environment recognition and localisation,
- Adaptive feed back cancellation can be adjust in different versions.
- Powerful and fast noise reduction against sudden sound picks and comfortable sounds,
- Powerful precaution against to high wind noise effect,
- Main structure that controls environmental sounds and noise reduction management,
- Different microphone options,
- Adaptive analyze system,
- Data Logging,
- Adjustable beep sounds,
- Adjustable low battery signal,
- Adjustable beep duration and levels,
- Adjustable VC steps,
- Fast adaptation technology.

CIC devices
*are smaller,
more attractive,
more elegant.*

elite Groups:

Elite 8 channel,

Elite 16 channel,

Elite 32 channel,

the technical characters of the groups can be varied by themselves.

A wide equipped serie:

✓ CIC	✓ BTE / RIC	✓ BTE / Medium	✓ EGA
✓ ITC	✓ BTE / Open Fit	✓ BTE / Super Power	
✓ ITE		✓ BTE / High Power
